

WHAT MAK GRILL® LOVERS ARE SAYING

"As a long-time "Pellethead", I love how my MAK cooks. It's able to reach super searing temperatures or create genuine wood smoked barbecue. I love all of the features on the Pellet Boss control. This is an incredible cooking machine!"

Bruce Bjorkman, Cooking Outdoors
With Mr.Barbecue-KXL Radio

"After tasting food from our MAK GRILL, we gave our gas grill to a neighbor! The MAK GRILL makes the food taste amazing, and the clean-up is a breeze. This grill is built to last and is easy to use."

Rod & Sue, Oregon

"I just want to compliment you guys on a doing such a great job with this grill, everything about it screams quality. It was a joy to put together and it made me proud to see what a well thought-out and well-built piece of equipment you are selling. I look forward to many happy years with my MAK and I will be a bullhorn of word of mouth advertising for you guys."

Tom Carter, California

"The MAK GRILL has everything I wanted, superb craftsmanship and American-made with a 3 year warranty. If you're looking for a pellet grill look no further than MAK Grills."

Rick & Chrystal, Pennsylvania

"We have been proud MAK owners for a year now. We compete in the professional BBQ circuit. The MAK is a great grill and smoker combined into one unit. It's easy to use and easy to clean. Our MAK GRILL has been in and out of our truck dozens of times and is still in perfect working condition."

Chris Juencke, Pit Master
Smokin' Yankee's BBQ Competition Team

"I have owned 5 of the most popular name brand smokers, including one that had to be loaded into my truck with a forklift. Not one of them compares to the MAK. The Pellet Boss digital controller is by far the best on the market. The first time I did ribs on the MAK, my wife Jan said "these are the best you have ever done". It is absolutely foolproof. I'll never be without a MAK."

Larry and Jan, Kentucky

WOOD PELLET BBQ SMOKER-GRILLS

Now You're Smokin!®

PASSION FOR AMERICA AND BARBECUE

CONSISTENT AND PRECISE COOKING CONTROL
not available on any other pellet grill

The **MAK GRILL®** was conceived and designed by precision metal experts Bob and Kerrie Tucker, and the staff at MAK GRILLS. Long-time grillers and barbecue enthusiasts, the Tuckers were fed-up with how their gas grill flared-up and dried out the food cooked on it. They knew they could come up with a better way to cook their favorite food outdoors.

MAK GRILLS are proudly manufactured in America by people who are passionate about manufacturing great products. The MAK GRILL allows you to create incredible tasting food that will turn ordinary meals into an extraordinary flavor adventure! Be ready to accept praise and compliments from your family and friends. The MAK GRILL allows every backyard cook to become a "MAK MASTER" at barbecuing, grilling and smoking.

Competition barbecue teams have used the MAK GRILL to win blue ribbons at prestigious events like the Way Out West Barbecue Championship and Wild West Barbecue Bash. You too will love the award winning flavor you achieve cooking on a MAK GRILL.

MAK GRILL® FEATURES

The MAK GRILL has more features than you can count on two hands! Here are some of the many reasons why a MAK GRILL belongs in your backyard.

- ★ MADE IN USA!

THE PELLET BOSS™ CONTROL

The heart of the MAK GRILL is the innovative and revolutionary Pellet Boss™ digital control. The Pellet Boss™ performs more than 15 separate functions including:

- ★ Pellet ignition confirmation
- ★ Setpoint temperature display
- ★ Smoke mode (170 degrees F.)
- ★ High temperature mode (500+ degrees F.)
- ★ Set cooking temperature in 5 degree increments from 200-450F.
- ★ Grill cooking temperature display
- ★ 3 Temperature Probe inputs—each individually programmable
- ★ 3 User Programs—with programmable time and temperature sequences
- ★ Count-down timer
- ★ Elapsed timer
- ★ Time and temperature alarms
- ★ Cool down mode
- ★ Active screen lock
- ★ Auto re-light
- ★ Active screen scroll

The Pellet Boss™ provides you with consistent and precise cooking control not available on any other pellet grill. The large, backlit display panel makes it easy to monitor your cooking. It's very easy to use and program.
